DIESEL AFTERTREATMENT SYSTEMS

RESTRICTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 17, drawn to a method/system comprising a thermodynamic model to estimate a catalyst temperature to estimate a hydrocarbon conversion efficiency to estimate an age indicative parameter, classified in class 73, subclass 118.1.
- II. Claims 7-12, drawn to a method comprising a thermodynamic model, which has as inputs a catalyst hydrocarbon conversion efficiency and a reductant amount, to estimate a catalyst temperature and to obtain an age indicative parameter (note, the age indicative parameter is not required to be obtained via the estimated catalyst temperature as required in invention I), classified in class 73, subclass 118.1.
- III. Claim 13, drawn to a method comprising estimating an exotherm based on the total amount of hydrocarbons available, the amount of hydrocarbons injected and the stored amount of hydrocarbons, classified in class 73, subclass 118.1.

- IV. Claims 14-16, drawn to a method for estimating a parameter indicative of a catalyst age based on a model where the parameter indicative of a catalyst age is used as an input to the model (the Examiner notes that the claim is unclear in that the Applicant has claimed that the parameter to be estimated from the model is used as an input to that model), classified in class 73, subclass 118.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. See MPEP § 806.05(d). In the instant case, each invention has separate utility as set forth above.

Because these inventions are distinct for the reasons given above and the search required for one invention is not required for the other inventions, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Art Unit: 2855

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
